Projects

.Social Media Web Application

(Technology used is Java and jsp pages)

This web Application is somewhat similar to online messenger application like Facebook in which we can add friends and update ourself .

.Online Shopping Website

(Technology used is JavaScript and SQL database)

In this Online shopping website there are multiple pages what are interlinked with each other and a client can login and create account and shop online.

.Online Ticket Reservation web application

(Technology used is JavaScript and HTML)

In this online ticket reservation we are able to book our tickets online and check the status of our flights ,buses and trains.

.Tic- Tac- Toe Game

(Technology used is Java and SWINGS)

This is the popular game Tic- Tac- Toe which is very popular among children and even elders also enjoy playing it sometimes.
